FT1DR/DE Software Update Information

(This firmware is not compatible with the FT1XDR/DE)

If you have the FT1XDR/DE please refer to FT1XDR/DE Software Update Information.

Caution!

Please be sure to confirm the model and the version of your transceiver before starting the update. Writing incorrect firmware to the transceiver may cause abnormal operation or failure. Do not install this version firmware to any FT1XDR/DE. The update firmware is NOT compatible between FT1DR/DE and FT1XDR/DE.

Refer to the software update procedure instructions in the help files (.pdf files) inside the ZIP folders.

Currently we have two different destination versions USA and EXP (including EU, AUS and CHN) of the FT1DR/DE. Please open the help file and review the information before starting the update software.

You must check the destination version radio you have and use the correct update firmware. The destination is marked on the box serial number label. If the box is not available, the country you purchased the radio in may indicate the destination. If the FCC part 15 rules statement is on the radio above the Serial/ID label, it is the USA version. Other versions will not have the FCC label.

- **DST: USA** version covers North and South America [**FT1D_ver207(USA).zip**]
- **DST: EU/EXP/AUS/CHN** covers all countries [**FT1D_ver207(EXP).zip**]
(EXP version software should be installed in all units other than USA)

After updating the MAIN software the DSP software must also be updated.

- DSP software [**PCTOOLe_v0410.zip**] is for all countries.

FT1DR/DE Main Version 2.07 (04/19/16)

- Improved and optimized.

NOTE: NOTE: When MAIN Software V2.07 is installed you must check the DSP Software version. If you do not have V0410 DSP Software, then it must also be installed at the same time (otherwise it may not function correctly). Refer to the Help File to find how to check the Main and DSP software version.

If you already have Main **V2.07** and DSP **V0410** software versions, it is not necessary to update the FT1DR/DE again.

We hope this new software will increase your enjoyment of your FT1DR/DE. Thank you for choosing Yaesu radios. If you have any problems or questions please contact Yaesu Amateur Tech Support @yaesu.
